Simple implementation of intelligent lighting control

The Akuvox MK485 is an 8 outputs relay controller. It could be used to control light, garage door or other home automation devices. It's easy for installation and could be controlled by Akuvox smart intercom system.

At a Glance

- 8 Relay Outputs

- Control lights or other devices

- Working with Akuvox Indoor Monitor

- Rail-mounting Installation

Physical & Power

- Communication：Modbus

- RS485：Support

- Relays out：8 relays, 16A

- Input：8

- RS485：Support

- Power supply：12VDC

- Communication distance：＜1000m

- Working temperature：−40℃~85℃

- Working humidity：0%~85%

- Installation：Rail-mounting
