BENEFITS

Standard Android Devices

The Fanvil SDK for third-party secondary development makes it an ideal choice for organizations looking to provide their users with a versatile, secure, and efficient means of accessing various services and applications.

Android 14

Android 14 is the latest version of Google's mobile operating system, and it comes with a host of new features and improvements that make it an exciting update for both users and developers.

Qualcomm® Snapdragon™ 685

Qualcomm® Snapdragon™ 685 4xA73@2.8GHz is a powerful and efficient mobile platform that meets all your work and play needs.

Fanvil Standard Android Devices V78

V78 is an advanced multifunctional smart device designed to meet the needs of modern office and multimedia applications. It is a Google-certified device, granting access to the Google Play Store and its extensive suite of applications, allowing for personalized customization to meet your specific needs. You can download essential business applications, such as Outlook, Teams, 3CX, and Zoom, providing you with the necessary tools to optimize your business operations. Offering open interfaces, it enables developers to install and integrate their own proprietary applications seamlessly. It is also equipped with a 10.95-inch high-definition display, a powerful processor, and a high-capacity battery. Whether for video conferencing,

High-Definition Audio

V78 has excellent audio quality that similar products do not have, built-in multiple smart functions such as echo cancellation and noise shielding, which can automatically remove interfering background noise.

Specifications
